Building Financial Security at Scale and Accelerating Partners' Impact

After 10 years, The Financial Clinic ("the Clinic") has demonstrated a "gold standard" model for building financial security for working poor families. A high-performing organization with a focus on results, the Clinic has put \$30 million back in the pockets of more than 15,000 customers, supported more than 260 organizations in 19 states embed financial security actions into their program models, and successfully launched several policy campaigns in support of working poor families.

Join the Clinic for a virtual presentation of **CHANGE MACHINE**

The Clinic's www.Change-Machine.org is an online support platform that enables nonprofit organizations and public agencies to incorporate powerful financial coaching strategies into their programs. By helping organizations rethink their business models, Change Machine strengthens their services, allowing them to achieve "faster, better, cheaper" outcomes. Our audience is not only the 1,000 or so financial coaches and counselors in the country; it's also built to meet the needs of the 1.8 million practitioners on the front-lines of anti-poverty programs. We aim to have this "swiss army knife" be on the desktops of thousands of practitioners; thereby supporting the financial security of an estimated 9 million low-income Americans by 2030!

The Clinic's next virtual presentation is Tuesday, May 12th at 3:00pm. Sign up at www.change-machine.org/events.
